

Checklist:

What to Consider When Choosing Key Marking Equipment

If you're looking for key marking equipment to increase ease and efficiency, there are a few things that you must consider to ensure that you get the most out of your investment.

- ☐ 1. **Ease of Use.** In order to mark any number of keys, it is important that you have the right equipment. Numberall has many models that are quick and easy to use. From our bench presses, platforms, handheld products that require a hammer blow, all the way up to our multi-wheel numbering heads, we have products that can most efficiently serve your marking needs.
- ☐ 2. **Legibility.** Hand stamps can be used for key identification, but it is very time consuming and legibility can be a problem. Numberall's multi-character marking devices maintain the product's alignment and quickly stamp all characters in one shot. Using one of our platforms or presses with the marking device provides consistent marking depths for greater legibility.
- ☐ 3. **Options.** Numberall has many options to offer. We even have special or universal key nests to properly hold the key for use in our equipment.
- ☐ 4. **Cost.** Numberall offers equipment to fit virtually any budget, from simple requirements all the way up to the very complex. A review of your key marking requirements is needed to quote the proper marking tools for you and your budget.
- ☐ 5. **Made to Last.** Numberall has been in business since 1930. We still supply parts to equipment that is over 50 years old. We are proud to say that all of our products are designed and manufactured in the U.S.A., and we stand behind the quality of our products.

Contact Numberall Stamp & Tool for more information on choosing the best key marking equipment to fit your needs.
