Custom Marking Solution For SodaStream® CO2 Gas Cylinders

Challenge:

SodaStream, required a marking solution for CO2 gas cylinders. The identification marks needed to withstand consumer use and repeated refilling cycles over the cylinder's lifespan, ensuring proper tracking, and compliance with regulations for compressed gas cylinders.

Requirements included:

- Applying deep, permanent, and legible marks on heavy steel or aluminum cylinders.
- Ensuring mark durability against corrosion, impact, and environmental exposure.
- Indenting codes on cylinders safely.

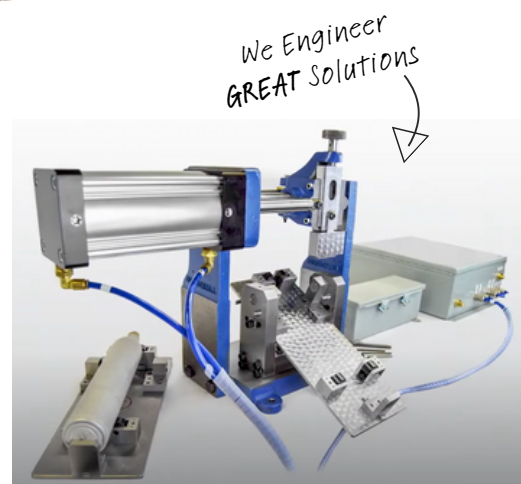

Benefits:

- Made in the USA
- Reduced down-time due to our robust and reliable designs
- Reliable, repeatable and accurate markings, improving sighting

NFBEV-200

Solution:

Numberall provided a customized solution by adapting a 301A roll marking press and Model 23P typeholder. The system was engineered to precisely roll deep, uniform marks onto cylinders, included two-button safety, and achieved a quick turnaround.
